

Technical Clarification (Second Time)

Dear Potential Bidders:

Here are some clarifications as followed:

6. Clothing washing tank - We will exclude clothing washing tank in our proposal. We would like to advise you to procure this locally to be more cost effective and efficient. Metso could provide you with the drawings to fabricate this tank locally.

Reply: The vendor could provide the clothing washing tank in prefabricated forming and we will weld and assemble on site.

7. Drain vat – could you please explain more what do you mean by Drain vat?

Reply: Drain vat is used for collecting filtrate and drain filtrate to the filtrate tank.

8. Cake Discharge – please also explain what would this refereing to in detail?

Reply: This is Cake Discharge Belt which is used for collecting the filter cake.

9. Slurry recycling automotive valve – please elaborate more what is this refereing to?

Reply: When stop feeding slurry to the filter, the slurry feeding valve will be closed and then the Slurry recycling automotive valve will open to return the slurry in the tube to the slurry tank. If the vendor's filter is not equipped this valve, please remark it on the quotation.

10. Cloth washing system – Metso will not quote for the tank for this system (plesae refer to point no.6)

Reply: Please refer to the reply no.6.
